COSTA BOUDOUVAS

SUMMARY

One of my most unique abilities is taking things apart, learning how they work, and devising new ways of leveraging components to unlock value. I have found that solutions are often limited by our own creative ability and I enjoy working with cross-dimensional teams to collaboratively solve the most difficult problems. I'm a passionate technologist, an astute observer, and excellent communicator constantly working to define and expand on what is possible.

EXPERIENCE

2010 – Present   **QUALITY ADVISORY BOARD (QAB)**   Philadelphia, PA
Big Pharma Quality Control – Usability and Technical Advisor
- Designed technical architecture for a cloud-based application to manage quality control data
- Created requirements gathering documentation and processes for agile development
